About

Senior Developer combining empathy, autonomy, and agility to effectively drive project goals. Expert in designing robust architectures—including Hexagonal, Microservices, CQRS, and Event Sourcing—with a strong commitment to technical best practices such as TDD, DDD, SOLID, and API First. I leverage open communication and positive motivation to lead teams and deliver high-quality software solutions.

Professional Experience

● Lead Developer | ZuidHub (Projet Yopleh)

Lead Developer | Nov 2025 – Présent

Developing "Yopleh," a solution designed to facilitate the transport of goods and people.

Managing Front Office (React Native/Expo) and Back Office (NestJS, PostgreSQL, Supabase) development.

● Lead Developer Consultant | NebulaGeek

Lead Developer | Juin 2023 – Nov 2025

BENSS & Santelink (Health Sector): Developed medical tracking and appointment scheduling applications.

IDF (Automotive Sector): Built a secure platform for vehicle rentals and peer-to-peer sharing.

Key Tasks: Supervised code quality, integrated secure payment systems, and managed monolithic architectures.

● Développeur Senior Full-Stack | DEEPPDREAMZ LTD

Full Stack | Mars 2024 – Juin 2025

Developed Dreamz Wallet, a fintech platform for payment and savings services.

Implemented microservices (KYC, Authentication) using Java 21, Spring 3, and Hexagonal Architecture.

Freelance Contributor | Various Projects

● Mounir Holding (Motodigo, QuickSave)

Led technical analysis, managed backlogs, and supervised development teams through daily meetings.

● Annuaire Universel & Hublot

Redefined application architectures for stability, optimized performance, and conducted code reviews.

● Cosna Afrique & Loov-Solutions (Fintech)

Cosna Wallet: Migrated legacy PHP/Laravel REST APIs to Java/Spring microservices (Payments, Transfers, KYC).

Education

2022 – 2023

- University Institute of Technology (IUT)
Bachelor's Degree in Software Engineering
